

Mendip Wildlife Community Garden

This wildlife Garden was opened in 2011 on ground which had become a hotspot for fly tipping and a general no man's land.

The following people are responsible for the upkeep of the wildlife garden and have put much work into this project (along with others) to bring something a little different to the area Wendy Lamb (chairperson) and Diane Nicholls (Treasurer) and Shirley O'Reilly (Secretary) and Pauline (Vice Chair)

Taking Shape

How it looks now

Our resident fox

A temporary bark pathway is to be put in place within the garden. This work will start on Friday 23rd January. While we understand that this will not be suitable for wheelchairs, it is a means to an end. Once in place work will be started on our 2nd pond. This was started at the beginning of last year and while it is unfortunate those who started it were unable to finish it, this year will see that completed. Keep an eye on this space, further projects are in the pipeline and we will keep you updated as each new piece of work is starting.

We are currently working with the Leonard Cheshire partnership and their great volunteers on a Friday, so if you feel like lending a hand please contact Wendy on: untamedwildchild@yahoo.com or contact the Community Development Team at South Essex Homes, who will pass on your details.
